

How To Add My Villa People Calendar to My Personal Website

There are two ways to add your Villa People calendar to your own personal website. At first glance these instructions may appear daunting - but it's actually very easy. Please contact us via the website if you have any difficulties.

Method 1 - Create a hyperlink to your calendar.

This is the easier of the two options. All you have to do is add the following code to your web page.

```
<a href="http://www.thevillapeople.co.uk/villas/villa####/calendar/">click here</a>
```

You need to change the '####' for your Villa ID number. You can also change the 'click here' text to say anything you like. For example 'check availability' or 'Availability Calendar'.

Example:

```
<a href="http://www.thevillapeople.co.uk/villas/villa1234/calendar/">my own text</a>
```

Method 2: Embed your calendar into your website using IFRAME

All you have to do is add the following code to your web page.

```
<iframe SCROLLING=no FRAMEBORDER=0 src="http://www.thevillapeople.co.uk/villas/villa####/calendar/" style="margin:0px;width:670px;height:800px;overflow:hidden;">If your browsers cannot show this calendar please <a href="http://www.thevillapeople.co.uk/villas/villa####/calendar/">click here</a></iframe>
```

Again you need to change the '####' for your Villa ID number (Please note there are two sets that need changing). You also change the 'click here' text to say anything you like. For example 'check availability' or 'Availability Calendar'.

If when embedding the calendar into your website it does not fit as well as you'd like you can alter the width and height accordingly - just change the numbers in red (670 and 800).

Example:

```
<iframe SCROLLING=no FRAMEBORDER=0 src="http://www.thevillapeople.co.uk/villas/villa1234/calendar/" style="margin:0px;width:700px;height:790px;overflow:hidden;">If your browsers cannot show this calendar please <a href="http://www.thevillapeople.co.uk/villas/villa1234/calendar/">my own text</a></iframe>
```
